

# SC20 SCC Team Profile

Team GeekPie\_HPC  
ShanghaiTech University

- **What is the name of your team and why did you choose it?**

Our team name is GeekPie\_HPC. GeekPie\_ is a large comprehensive student association in our school attracting science enthusiasts of different backgrounds. The underscore simulates a blinking cursor in the command line. The association has various branches like GeekPie\_Robotics, GeekPie\_Security and GeekPie\_DevOps. We are the HPC branch, so our team name is GeekPie\_HPC.

- **Why do you think your team will have an edge in the event (what's your secret sauce)?**

Since we have invested huge amount of efforts in building our DevOps and Coding ability this year. Meanwhile, never before has the technology been so advanced; never before has the open-sourced spirit been so popular and never before have we gotten such a tremendous support from our school, instructors, and, most importantly, by each others.

By the way, Harry Chen has graduated, how could we fear THU, haha!

- **What have you done to prepare that makes your team unique?**

We are 5 vegetable chickens and 1 happy princess, plus one big cow and another big cow.

Formally, half of our team members took the Parallel Computing course last semester and learned a bunch of parallel algorithms. We treated each other chickens every group meetings periodically to push each other become fatter in knowledge.

We also proved our team is unique: As the competition rule stated, each member can participate in at most one team. Conversely, if any two picked teams share any member, then they must be the same team. As far as the uniqueness of human individuals is admitted, the uniqueness of any team is trivially induced.

- **What are you most looking forward to in the competition?**

Championship!

- **What time zone is your team competing from?**  
GMT+8.

- **What do your team members do for fun?**

We are to conquer the benchmark for Reinforcement Learning - MoJoCo (<http://www.mujooco.org/>) for fun.

- **If your team had a theme song, what would it be?**

Invincible <https://youtu.be/gHbo2mtroTk>

- **Can you share an interesting fact about your team?**

We are from the youngest school among all the participants. We will celebrate our centennial anniversary after 93 years.
